

# XANDLA FAMBA XANDLA VUYA

(The hand that gives is the hand that receives)

Mzumbe Group believes in mentoring the rising generation and shares her knowledge, experience and influence with others, which we are so humbled and grateful to be able to do as an emerging corporate.

Our Focus has been in 4 Key Areas:

1. Donating of computer Laboratories to underprivileged and rural schools across South Africa in lending our efforts and resources to bridging the digital divide and promote Universal Access to All.
2. Skills Development in Technology: We took students, sponsored them completely and enrolled them into an intensive one year SAP certificate programme for graduates (6 months academic and 6 months project practical experience). The students are now employed in RSA as SAP consultants in blue chip companies
3. Learnerships: We pride ourselves in providing learnership opportunities to graduates with an interest in Technology
4. SMME access and development: We have a special focus in Women of all ages who need opportunities to start a business but have no product, tools or administrative support to enable their dreams. We provide a basket of products that are daily essentials and assist in developing and accessing their market including financial support where possible.
